

About WeMited Innovations

WeMited Innovations is a one-stop solution to all your mobile and web development projects. We develop applications ranging from business to games supporting both Android and iOS.

We are also well known for our successful IT services and designing expertise.

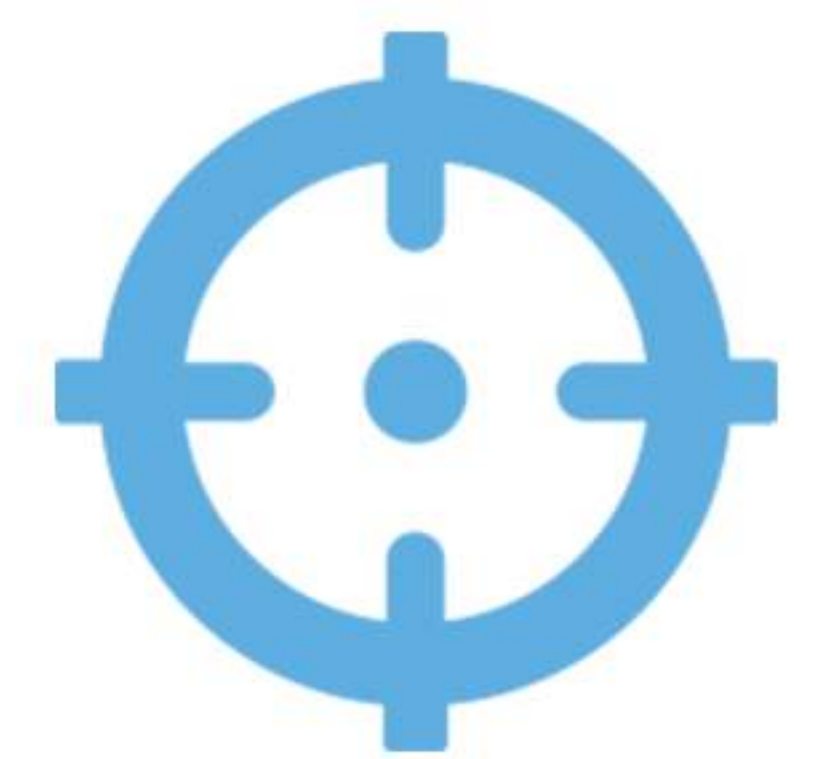

Our team of creative experts strive to provide you with unparalleled solutions that take you way ahead from your competitors. We ensure that the expertise of our team bring your dreams into reality.

Who We Are

WeMited Team's expertise helps you decode your ideas.

The team focuses on the concept, designing and development, checking quality assurance both at an internal and client level and finally the launch, encouraging feedback all throughout the process on positive criticism.

Mission

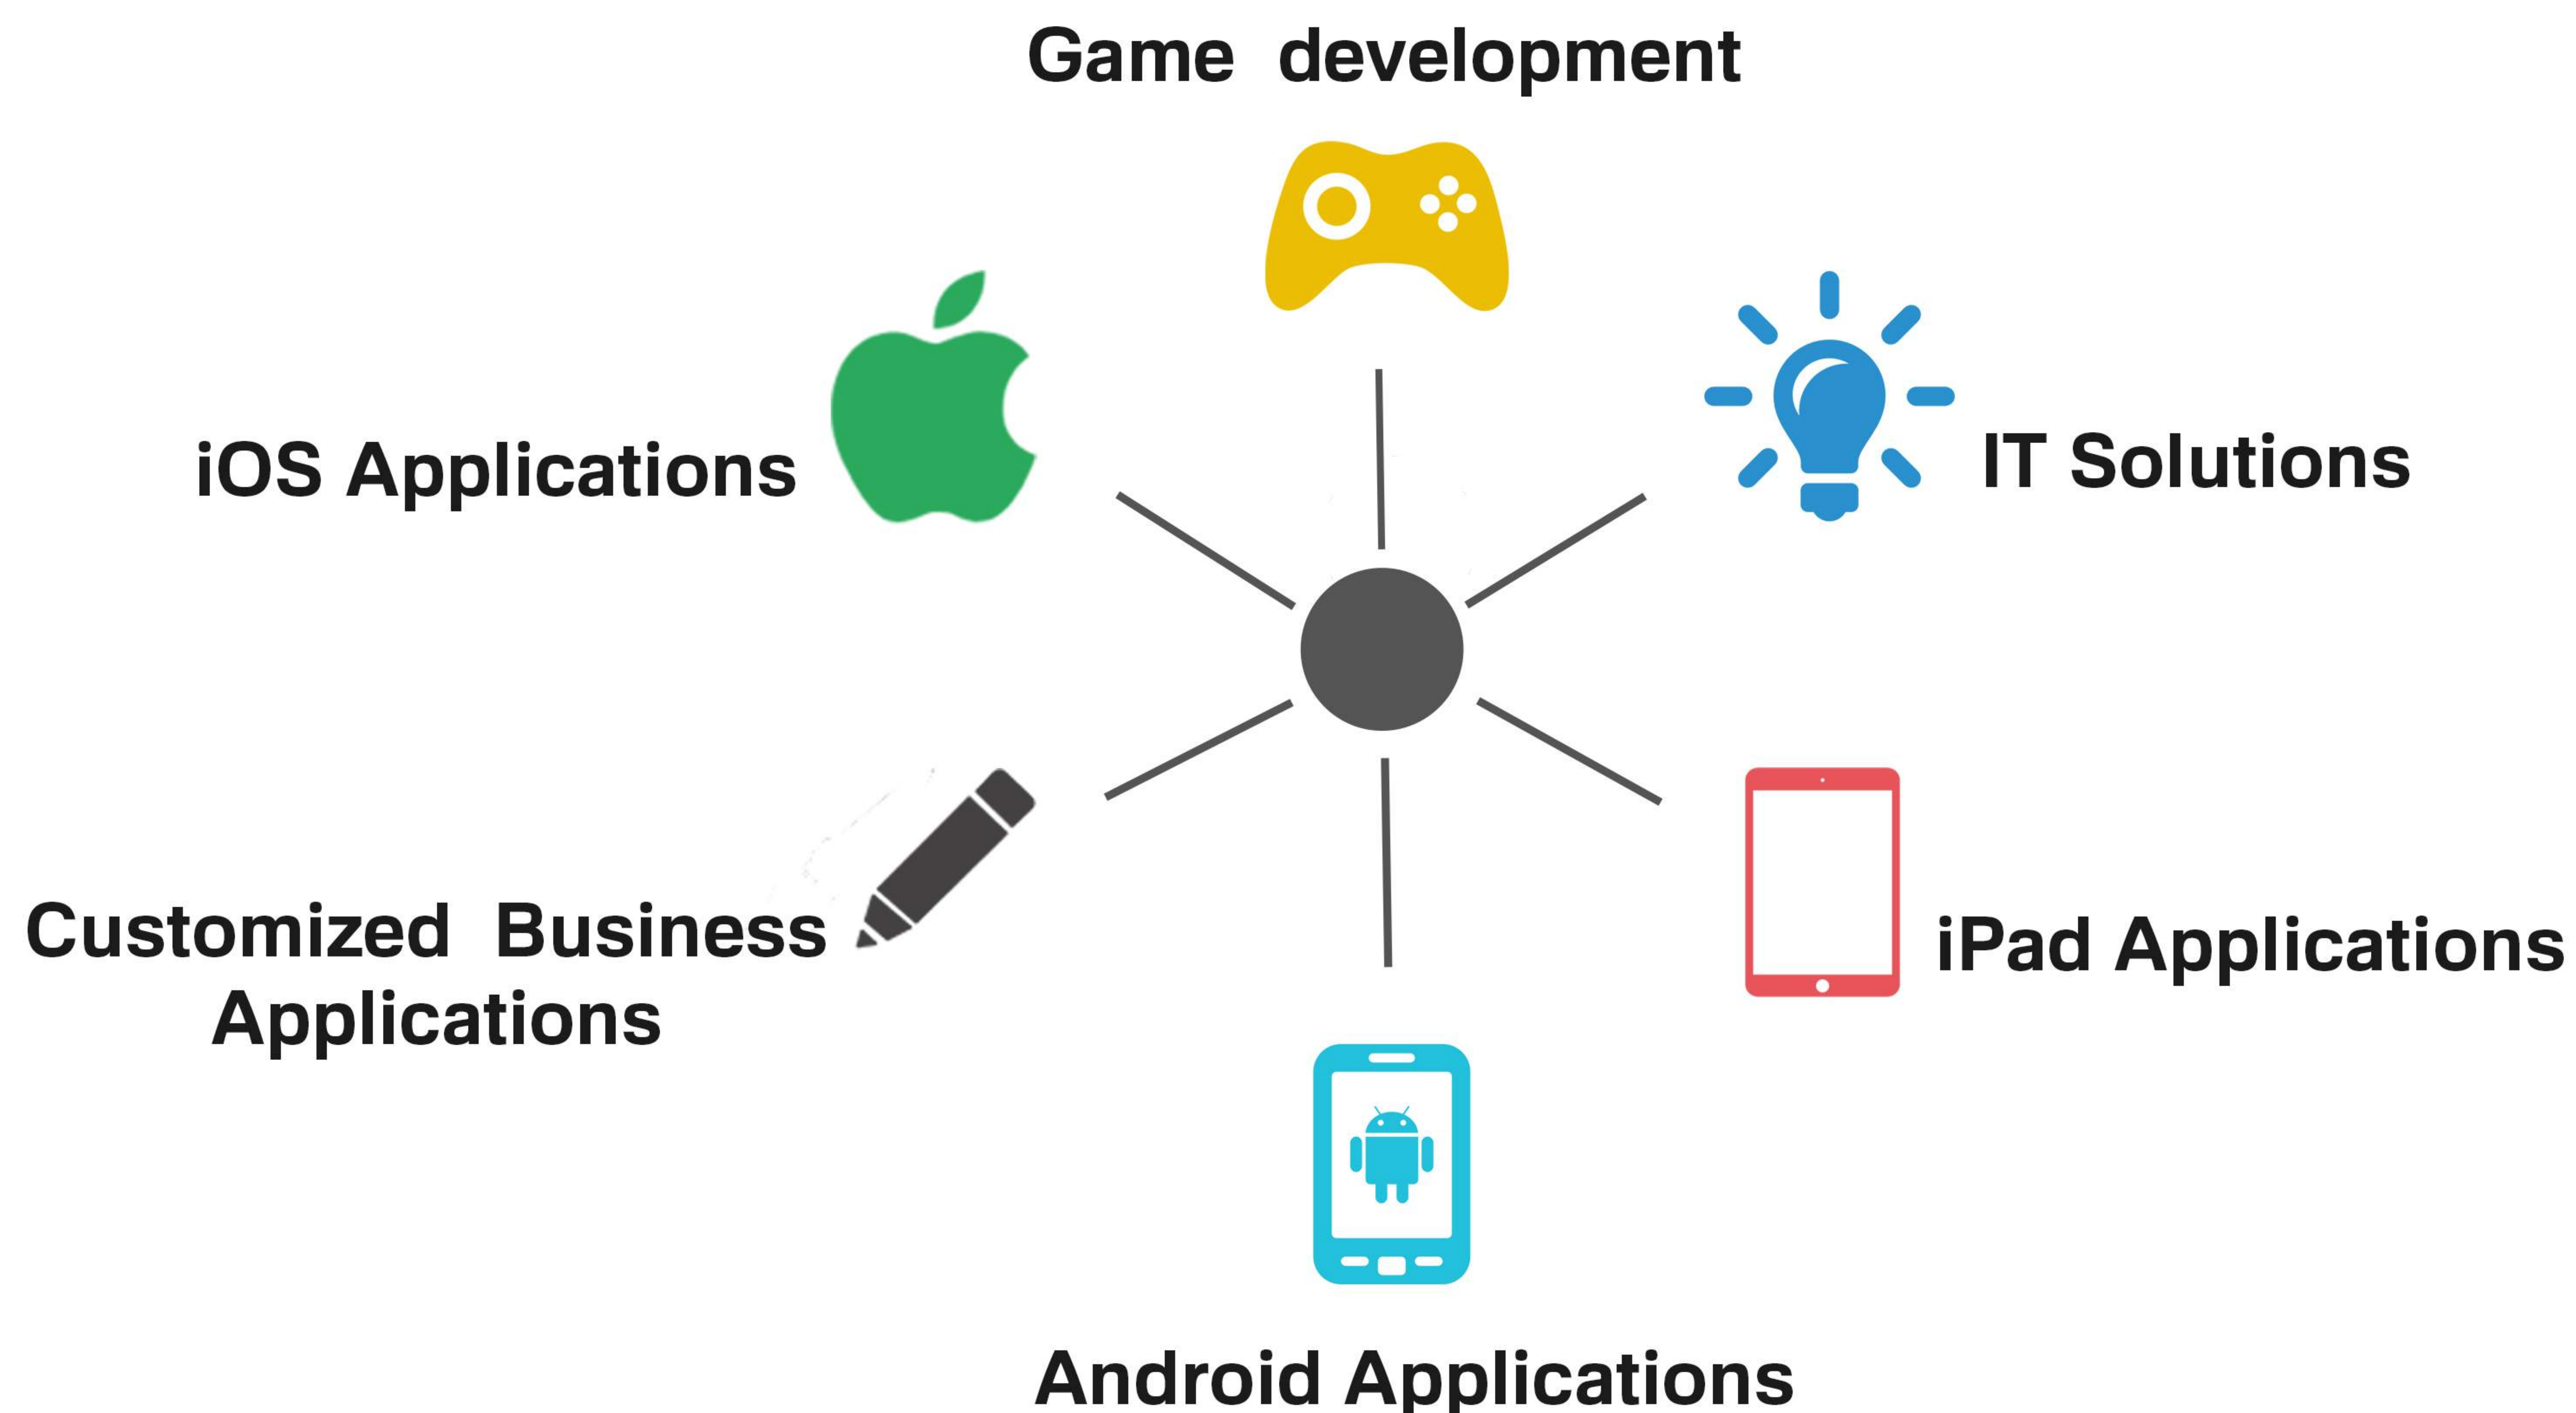

In our mission to become one of the leading brands in mobility solutions, we take utmost care of your needs and understand that serving you with the best is our utmost priority. Our basic principle lies in believing in people and their ideas and helping them achieve their dreams.

What We Do

In our efforts to help our clients create integrated mobility solutions including analytics we look forward to offer our unique expertise nurturing a full spectrum of online and app development services.

We pay great attention to the details and strive to provide you with best quality applications. We aim to further diversify our arenas while promising to always follow transparent policies and procedures .

Our diverse set of services include-

Why WeMited Innovations?

Expertise: Our team of experts are ever ready to guide you through and provide you best solutions to IT and applications related issues.

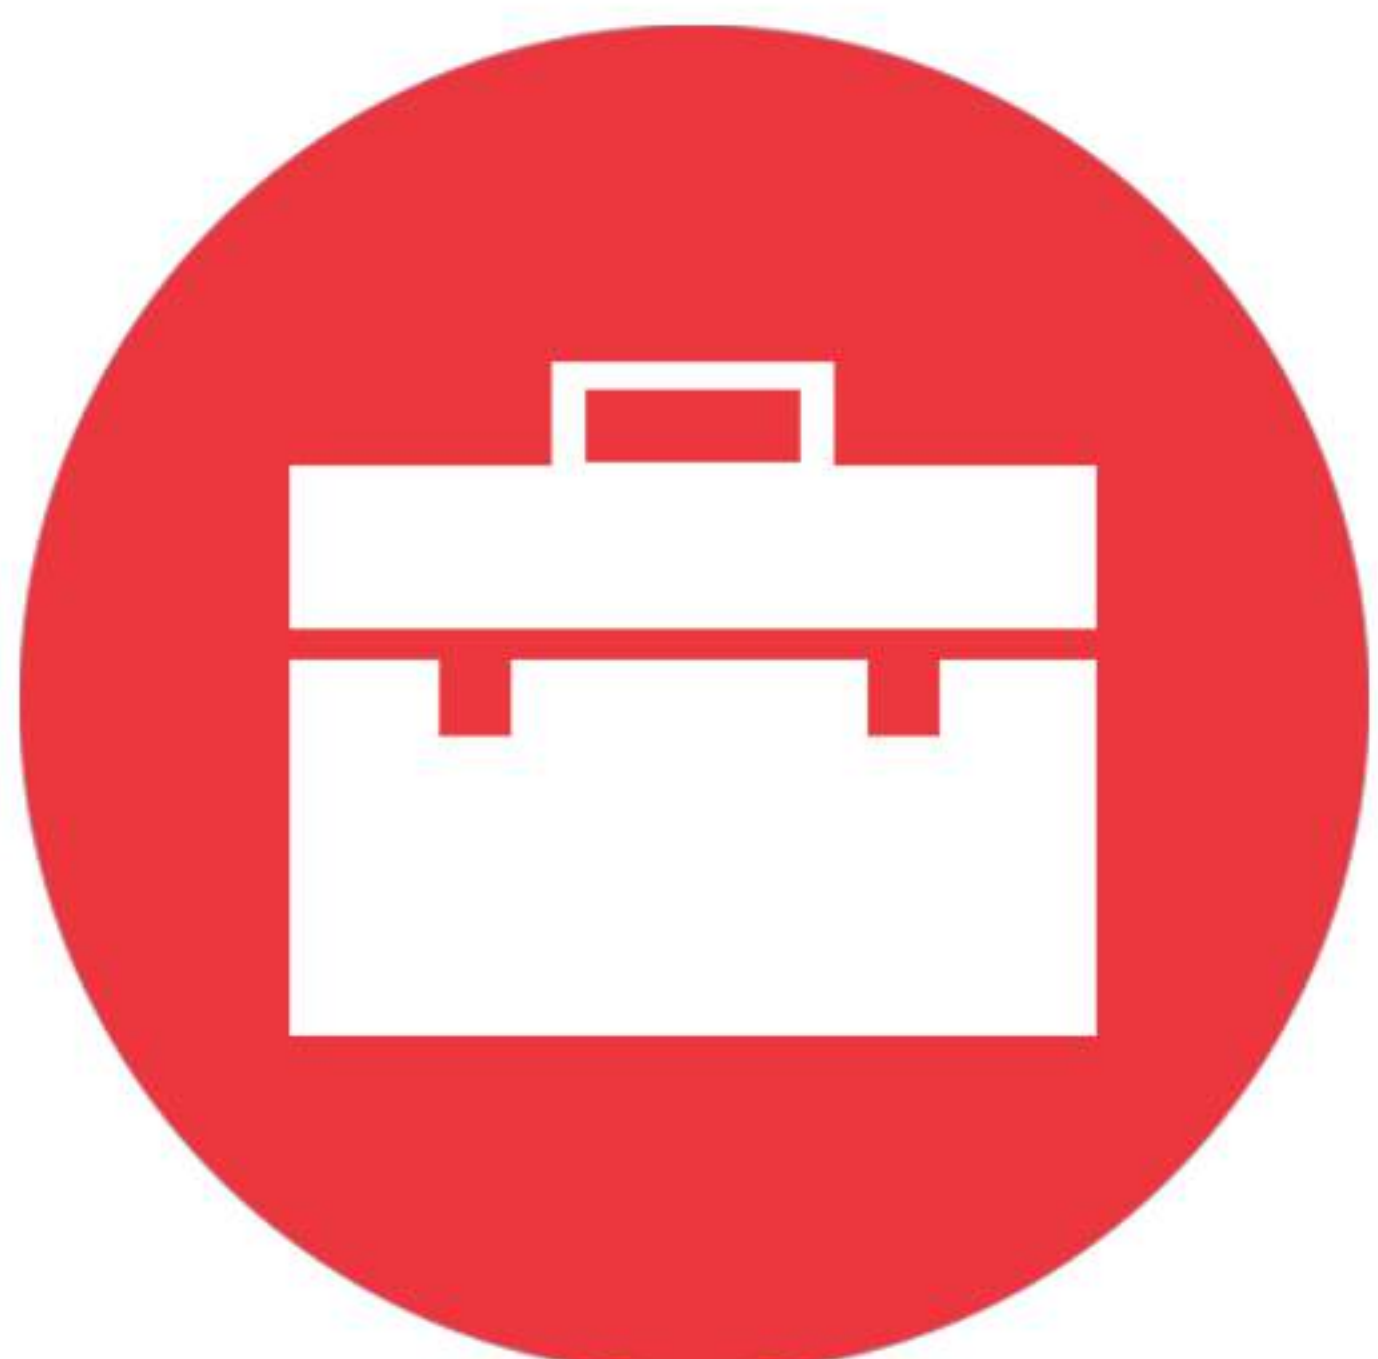

Experience

We have developed and successfully delivered over 120+ apps in a period of 3 years across mobile gaming, startups, enterprise solutions and internet of things.

Team

With a cherry-picked team of dedicated and expert developers, creative designers and a team which puts client first always does the magic for us in mobile gaming, startups, enterprise solutions and internet of things.

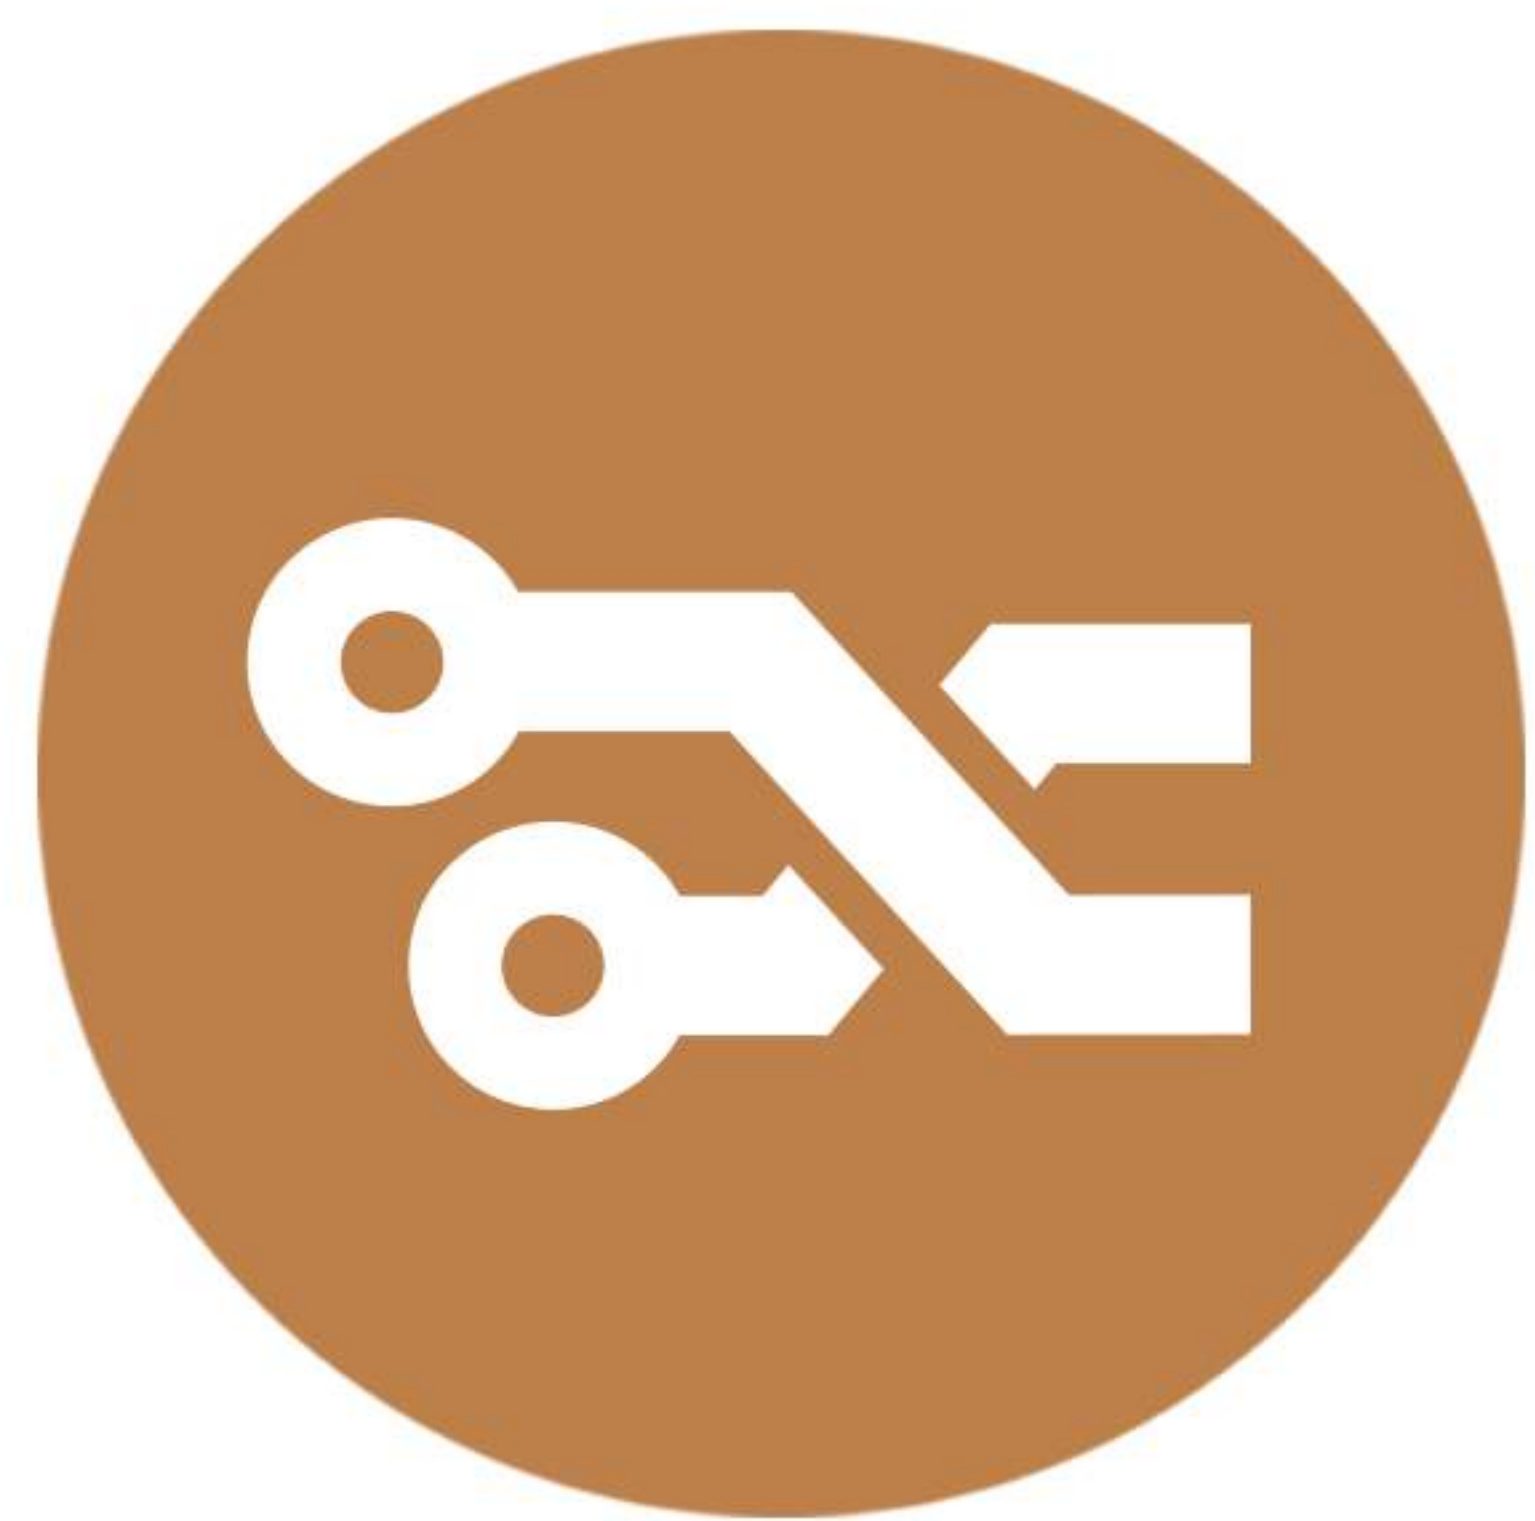

Portfolio

A look at our portfolio will speak for the quality of our work. Our expertise and commitment to succeed has resulted in our portfolio being so vast along the breadth of verticals.

Client Love Us

Our clients love us and keep coming back to us. We have a whopping 40% of repeat business.

Technology

We use the best and latest technology for each of our processes and leave no stone unturned to get your app enveloped on best suited set of technologies.

Client Support

We are dedicated towards serving our customers. And that is why we went ahead to develop and distribute Apps for easy sharing of beta apps, just for our clients. We also provide marketing, consultation and post go-live support for 2 months.

Startups

Startups are tough - pitches, iterations and competition. We will create the dream MVP to get to the next round.

Enterprise Mobility

A solid understanding of business processes coupled with an extreme emphasis on User Experience helps engineer solutions that empower today's mobile workforce anytime anywhere.

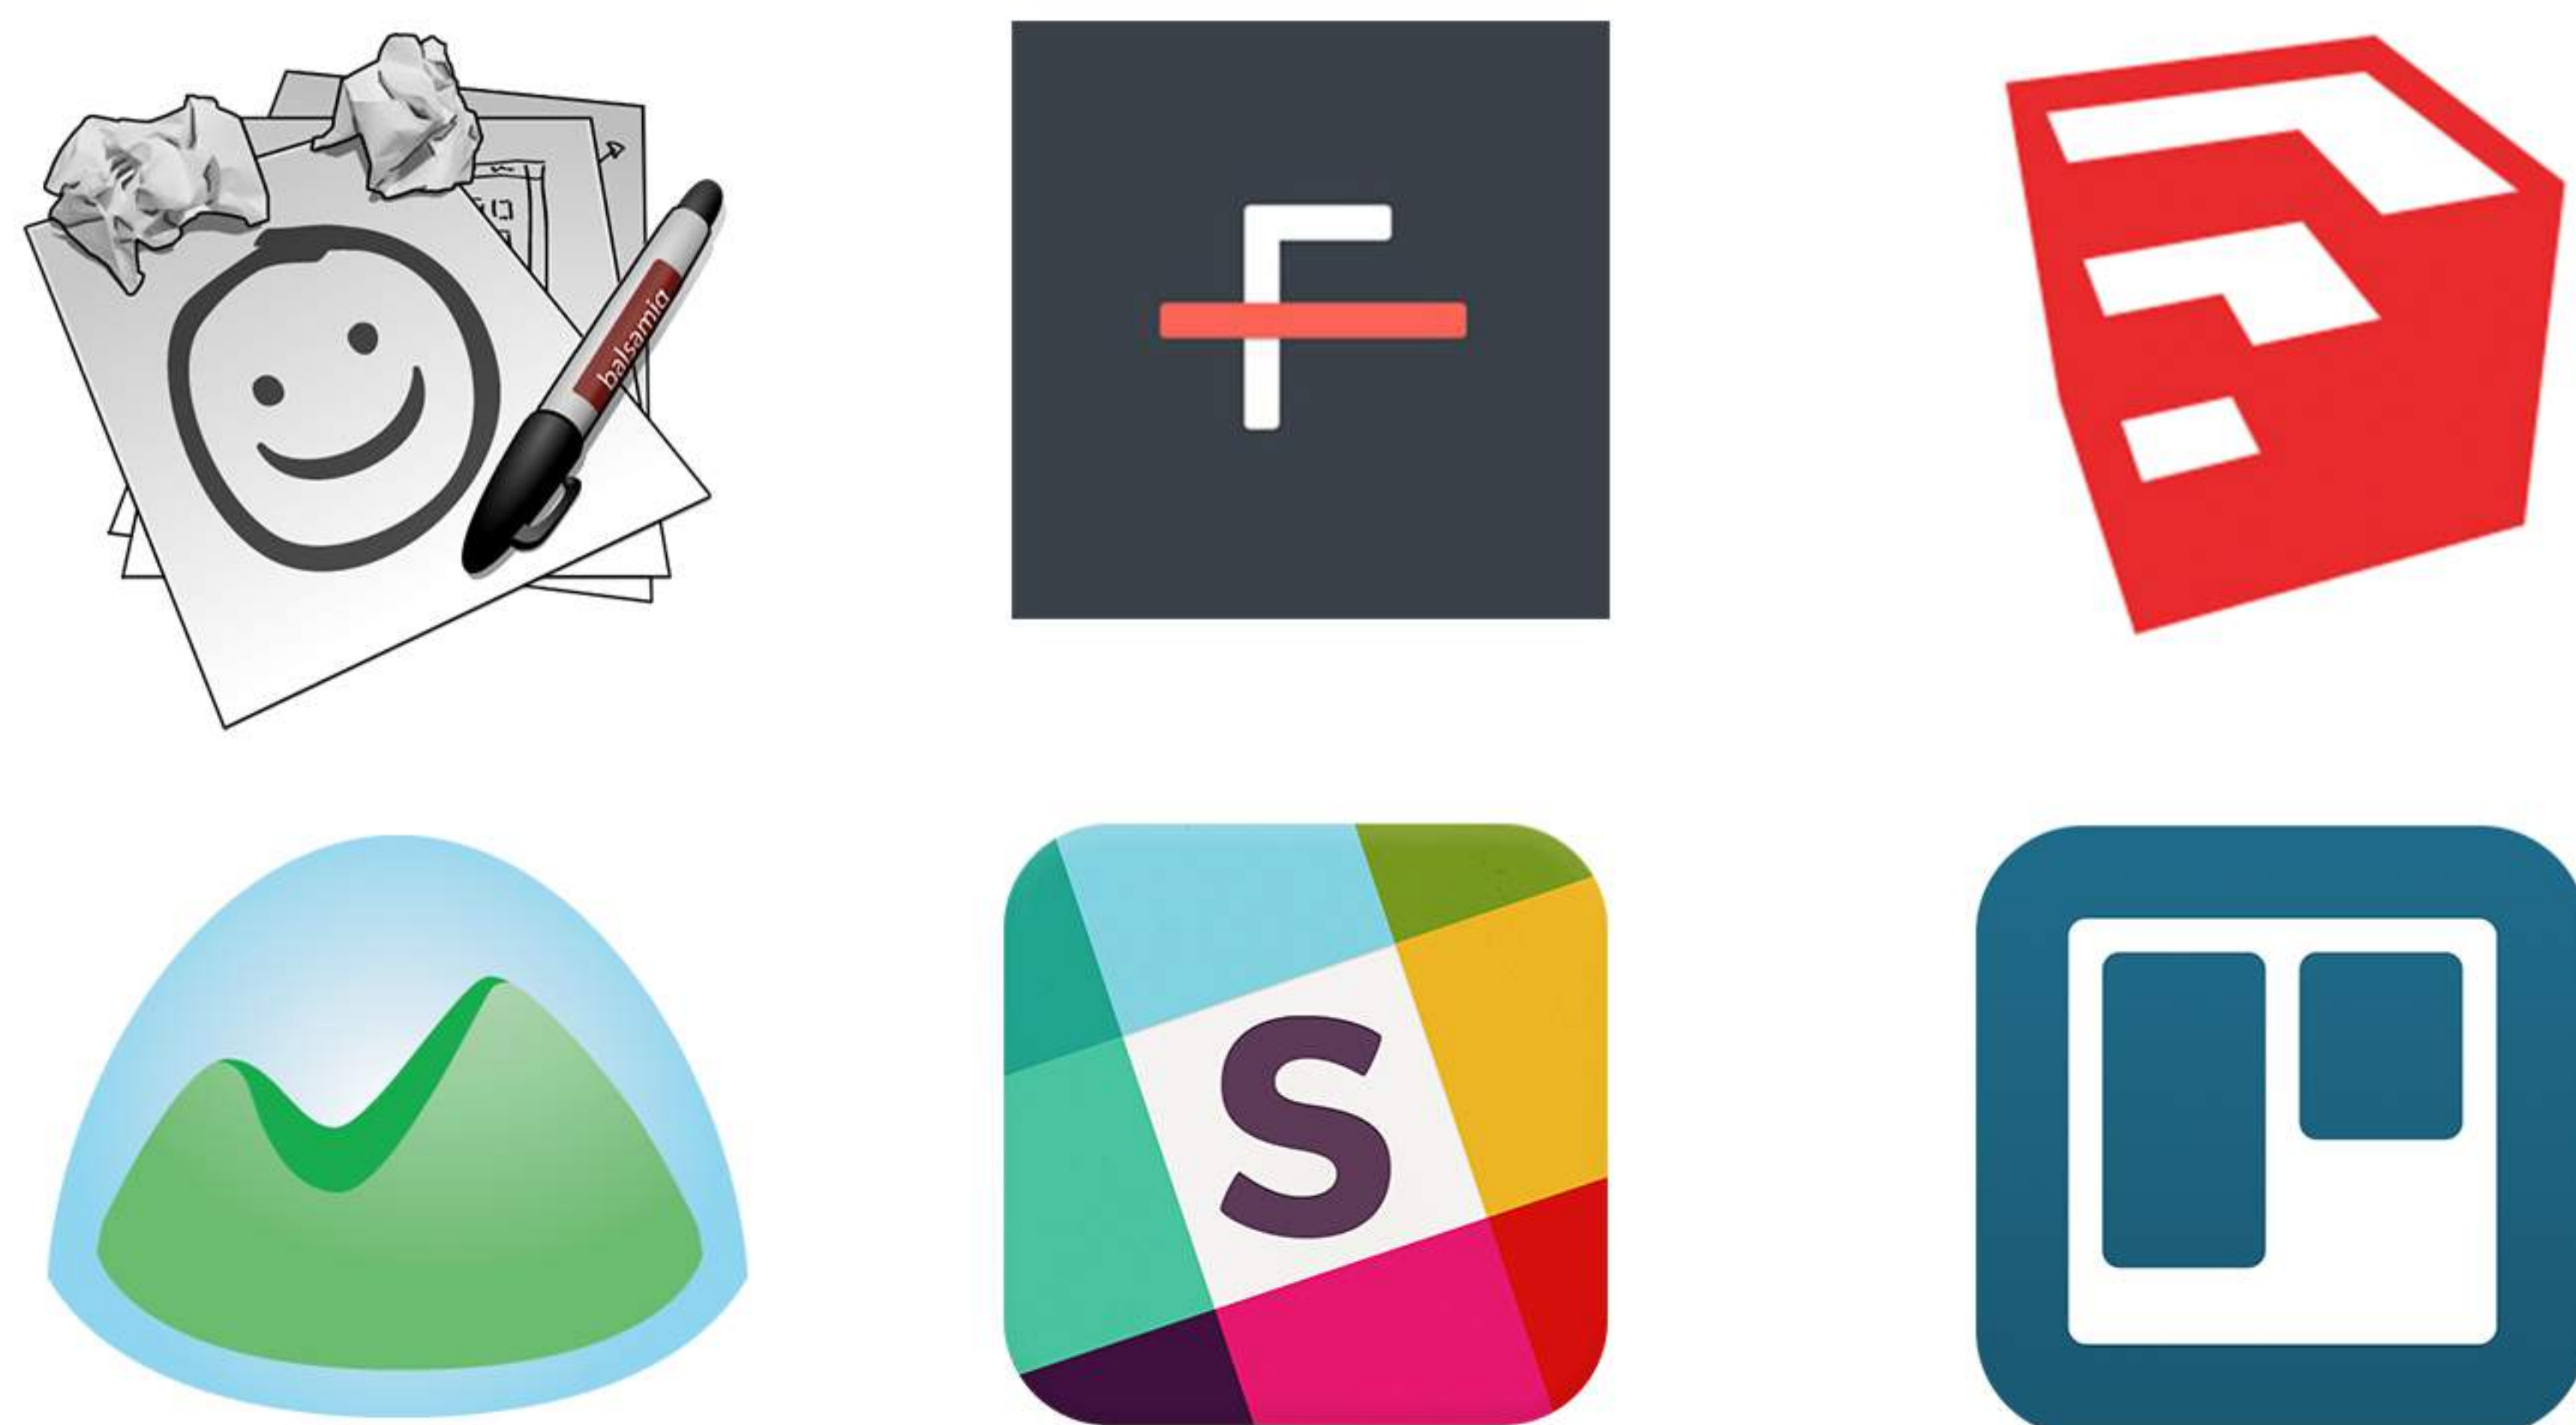

Internet of Things

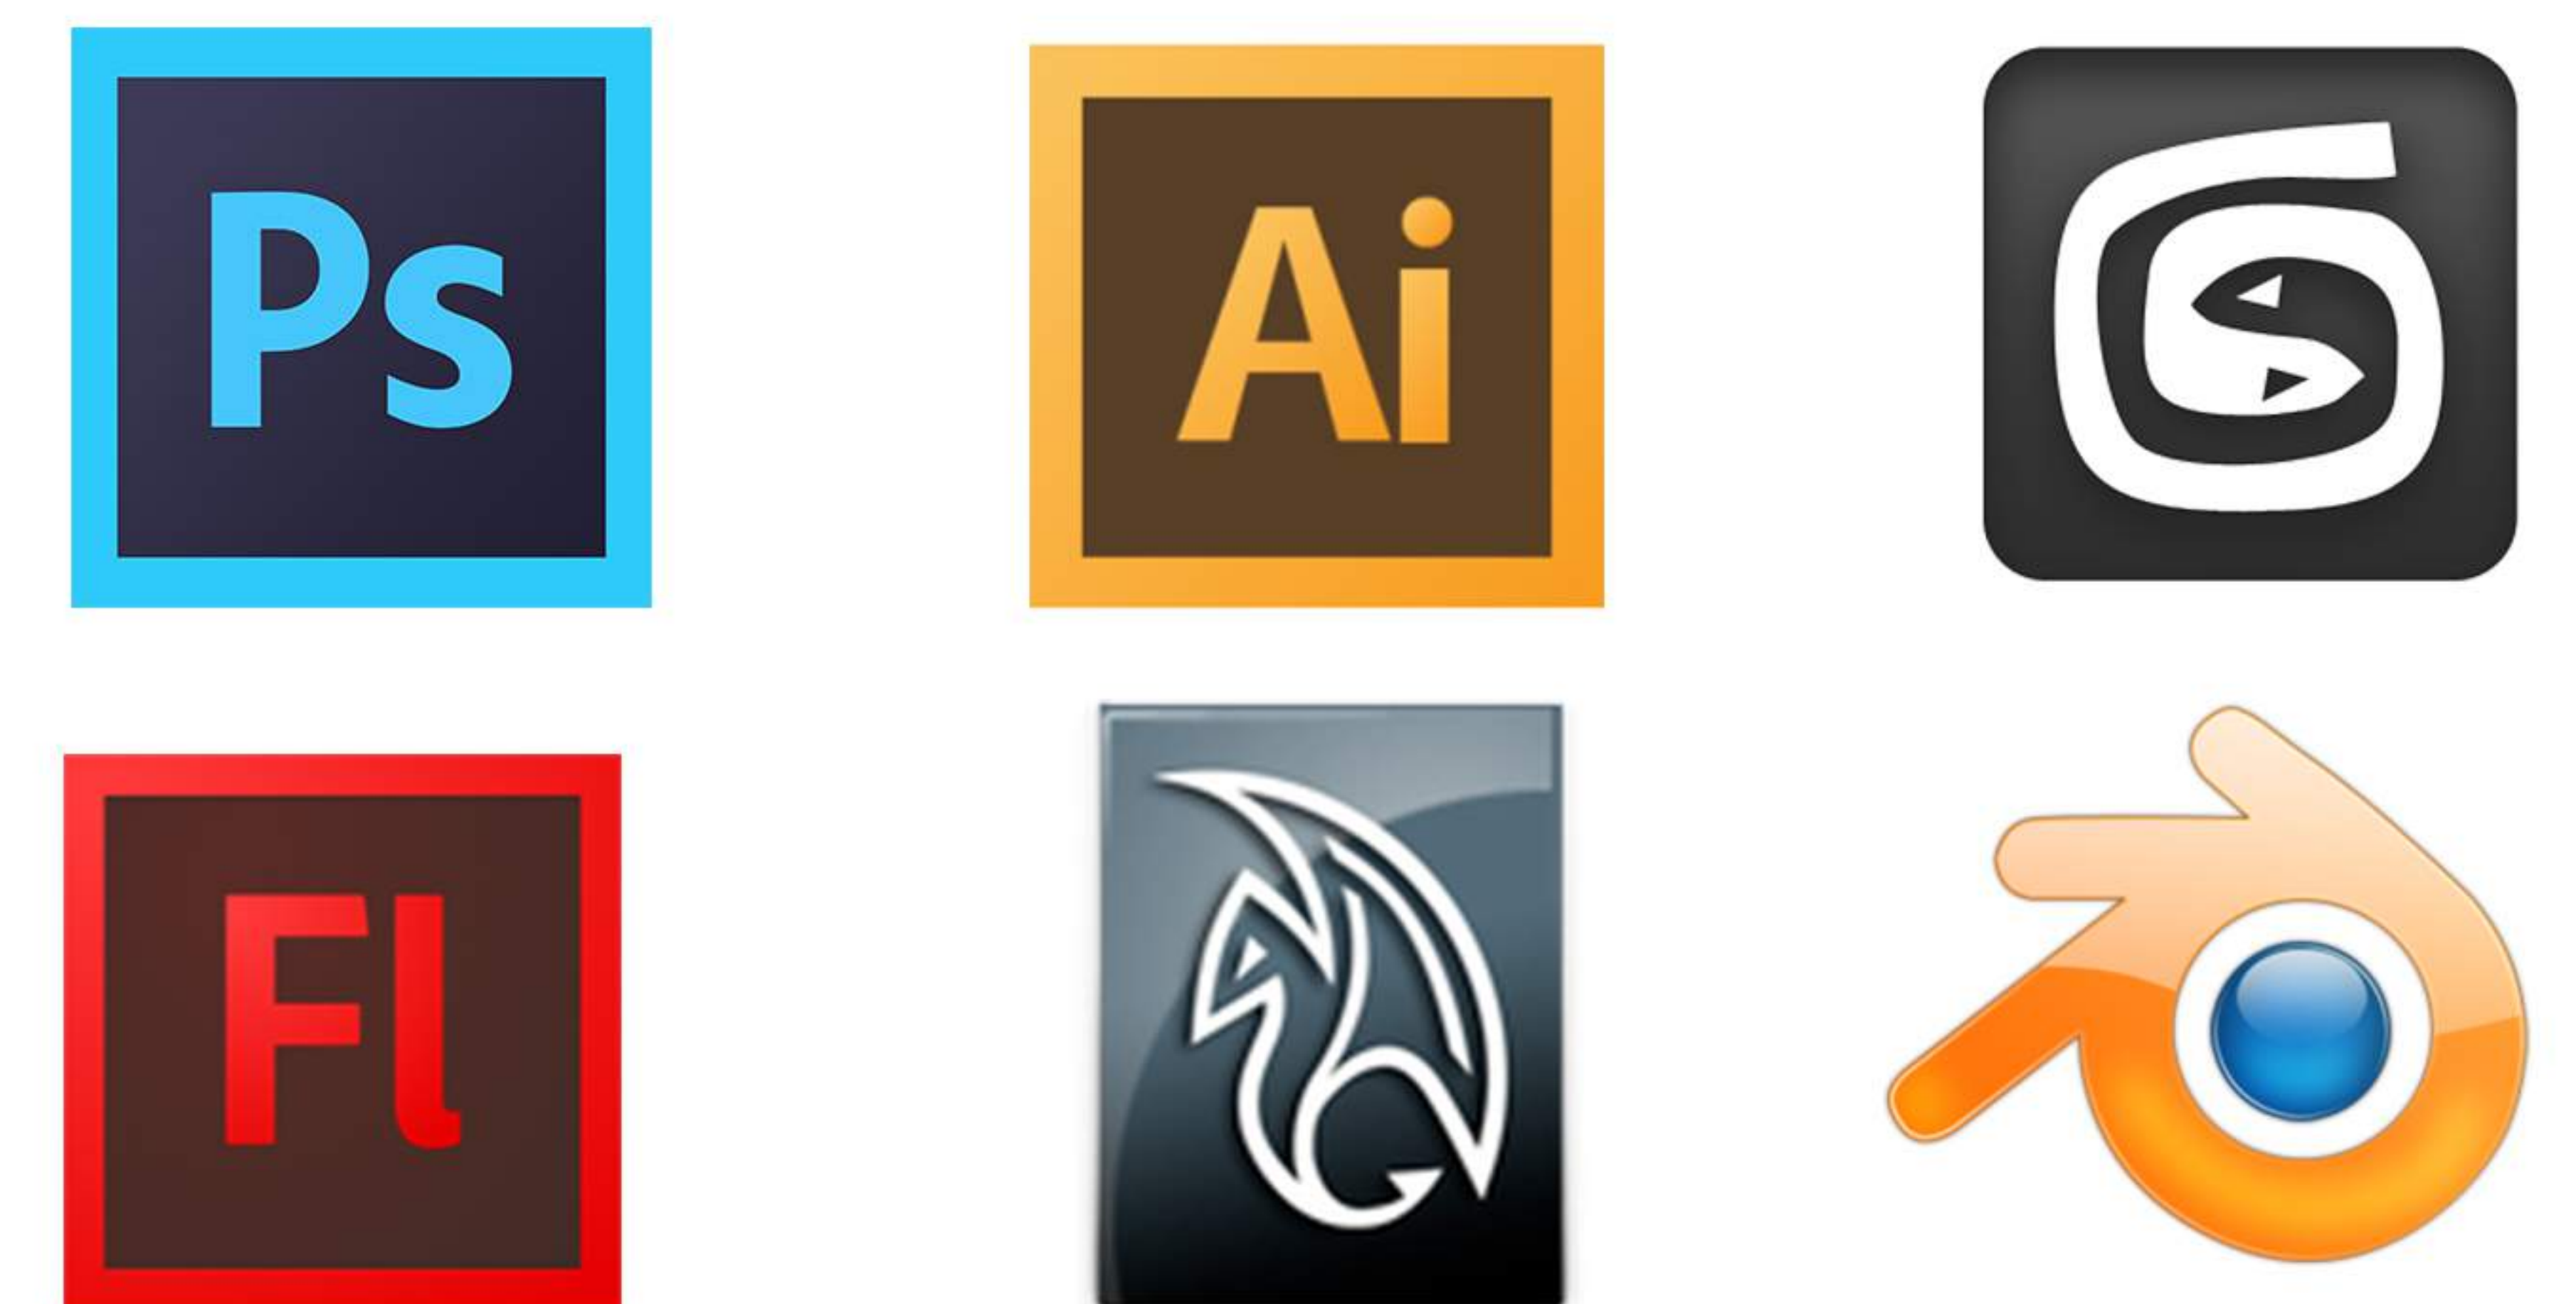

A deep understanding of technology coupled with a young, enthusiastic team will surely get you to develop the technology of the future.
